Dear Customer:

Here's your copy of The Visible Computer: 6502. I think you'll find it a powerful system for learning machine language programming. Although we've made every effort to insure the accuracy of both the Visible Computer: 6502 program disk and manual, if you find something that we missed, or simply have comments or suggestions, please let us know.

The Visible Computer: 6502 program disk is copy protected. Should it ever fail to load, we will replace the disk for a fee of \$5.00. During the ninety day warranty period there is no charge for replacement.

If you wish to purchase a backup copy, one is available for \$5.00. Only registered owners may purchase a backup, so take a minute now to fill in the form below and drop it in the mail. This information will allow us to keep you informed about possible updates and related products of interest.

Good programming!

George Cowsar
President, Software Masters
